

e-slab®
engineered LVL panel

e-slab [architectural]®
engineered visual grade LVL panel

e-slab and e-slab architectural are mass or solid panel timber elements that provide the architect, engineer and prefabricator with a range of new structural and visual possibilities. e-slab and e-slab architectural are suitable for use in a range of applications and in all building types up to 20 stories in height (subject to engineering and fire design).

Wesbeam's e-slab and e-slab architectural products are engineered timber panels that are the perfect engineered wood product for use in the manufacture of prefabricated structural wall panels, floor slabs and large format columns and beams.

FEATURES AND BENEFITS

- Australian made
- High strength to weight ratio solid engineered timber panel
- Width – 1.2m
- Thickness range – 28mm, 35mm, 45mm, 63mm, 75mm
- Easy to work with to create encapsulated prefabricated structural elements
- e2S treated, a CodeMark® certified glue-line termite treatment
- Factory applied Wesbeam blue e-seal
- Wesbeam has full Chain of Custody aligned with the Responsible Wood (RW) Certification Scheme and Program for the Endorsement of Forest Certification (PEFC)
- Made to order, contact Wesbeam for lead times

- Australian made
- High strength to weight ratio solid engineered timber panel
- Width – 1.2m
- Thickness range – 28mm, 35mm, 45mm, 63mm, 75mm
- Exposed natural high feature natural timber surface on top and bottom face
- Closed scarf joints on the face
- No blue e-seal applied
- e2S treated, a CodeMark® certified glue-line termite treatment
- Easy to work with and requires minimal preparation create expressed column, beam and slab elements
- Wesbeam has full Chain of Custody aligned with the Responsible Wood (RW) Certification Scheme and Program for the Endorsement of Forest Certification (PEFC)
- Made to order, contact Wesbeam for lead times
